(Channeling begins)

Djwhal Khul here. Tashi Delek.

Alright. This week I want to talk about thoughts, the thinking process, how thoughts are transferred from one sentient being to another and how thoughts become things. We're heading into a time period with a lot of mental transparency.

We're going to do a Teleseminar on "Mental Transparency" on September 22nd because it is time to go much more deeply into it. When you look at something like, maybe you just look at someone's t-shirt and say "That's a beautiful shade of blue." They nearly instantly, you know within a fraction of a second, receive the thought form.

What is happening quite naturally with all of our psychic Pisces activity in the sky, and that would include the Moon and Chiron and a few other things going on there, is that the delivery of the thought is even faster and if the thought has a lot of emotion with it, it really packs a punch. So a negative thought especially, almost like the energy body takes a hit literally, it can be traumatizing to the nervous system even. A very kind of almost overwhelmingly pleasant thought likewise will be like taking a hit to the energy body but might produce something like a feeling of euphoria and that sort of thing.

So the power of your thoughts, how you think about yourself, how you think about others, how you think about reality is very, very important and I do suggest you clean up as many of them as you possibly can. Remember we have pattern removal and tapping and a number of techniques that can help discharge the energies so please diligently practice what tools you do have.

As always, thank you and my love to you.
